

Table 1: **Debt Choice: Full-Period Issuer Aggregates**

This table repeats the point-in-time debt-choice specifications using debt issued by each issuer over the full 2000–2020 sample. County controls use GDP, personal income, city population, and debt issued by other entities in the county. Standard errors are clustered by state.

Panel A: GO vote required

Table 2: **Debt Choice and Aggregate Yields: Full-Period Border-State Issuer Aggregates**

This table repeats the point-in-time border-state specifications using debt issued by each issuer over the full 2000–2020 sample. Column 3 uses total Mergent GO plus revenue debt rather than Census debt. State-border fixed effects are included and standard errors are clustered by state-year; year is fixed at 2001 in this issuer-level cross section, so these clusters coincide with state clusters.

Panel E: Full-period issuer aggregates, border-state sample

	Pct UTGO (1) OLS	Full Wtd. Avg. Yield Spread (2) OLS	Mergent GO + Revenue Debt (3) Poisson
Vote	-0.282*** (-4.49)	-0.079 (-1.03)	-0.665*** (-6.30)

Table 3: **Aggregate Yields and Debt: Full-Period Issuer Aggregates**

This table repeats the point-in-time aggregate-yield and PPML debt specifications using debt issued by each issuer over the full 2000–2020 sample. The yield regressions omit Census total debt, which is unavailable at this unit, and control for debt issued by other entities in the county. The debt panel reports only total Mergent GO plus revenue debt. Standard errors are clustered by state.

Panel C: Full-period issuer aggregate yield spreads, full sample

	Full Wtd. Avg. Yield Spread (1)	All GO Yield Spread (2)	Revenue Yield Spread (3)
GO Vote	0.133** (2.57)	0.109*** (3.06)	0.089 (1.33)

Table 4: **Debt and Revenue Substitution: Full-Period Issuer Aggregates**

This table repeats the point-in-time substitution specifications using debt issued over the full 2000–2020 sample. Panel A reports only total Mergent GO plus revenue debt because Census debt outcomes are unavailable in the issuer aggregate. Panels B and C aggregate DPC use-of-proceeds categories over the full sample. Standard errors are clustered by state.
